

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**ECM Dynamic Credit Fund**, a sub-fund of ECM Credit Fund SICAV  
**Class I (CHF) Shares-distr. (hedged)** (LU0861003555)

Wells Fargo Asset Management Luxembourg S.A., an authorised UCITS management company, acts as Management Company of the Fund.

## Objectives and Investment Policy

### Objective

The fund aims to provide investors with consistently superior returns from a highly diversified actively managed portfolio of fixed income securities such as bonds.

### Investment Policy

The fund will invest in at least 50% Investment Grade fixed income securities on a global basis. Investment will mainly be in corporate, banking and sovereign Investment Grade securities. Sovereign securities are bonds that are issued by a national government. The fund is also able to invest in Sub-Investment Grade securities. Investment Grade is a term for instruments with a low risk of default. Non-Investment Grade instruments potentially have a higher risk of default but also potentially offer a higher rate of return. All fixed income securities will be rated by at least one of the three independent credit rating agencies: Moody's, Standard & Poor's and Fitch.

The Sub-Fund may use derivatives (complex financial instruments such as futures, options and swaps) for the purposes of meeting the Sub-Fund's objectives and in an attempt to increase, lower or maintain the risk level of the Sub-Fund, although this may not be achieved and may result in losses for the Sub-Fund. Derivatives may also be used to generate exposure to investments exceeding the net asset value ("NAV") of the Sub-Fund, thereby exposing the Sub-Fund to a higher degree of risk and increasing the likelihood of greater fluctuations in the NAV, including the magnitude of losses, than otherwise would be the case.

The fund should be treated as a medium to long-term investment.

### Dealing Frequency

You can buy or sell shares on every Business Day during a month. A Business Day is any weekday when banks are open in London and Luxembourg. To sell shares, requests must be made to the registrar no later than 16:00 (Luxembourg time) on the sale day.

### Distribution Policy

As this share class is distributing, any income from the fund's investments will be paid as dividends.

For full details of the objectives and investment policy of the fund please refer to the prospectus.

## Risk and Reward Profile

change over time. A risk indicator of "1" does not mean that the investment is "risk free". The indicator is not a measure of the possibility of losing your investment.

The fund is ranked at 2, which reflects that historically the fund has exhibited positive or negative performance fluctuations of a very limited nature.

### Other Particular Risks

The fund is also subject to risks, which are not included in the calculation of the risk-reward indicator associated with the following:

- Credit risk - The risk of loss caused by the failure of a counterparty to meet its obligations.
- Derivatives Risk - As described in the Investment Policy above, there are risks arising from the use of derivatives in this portfolio.
- Emerging markets risk - Investments made in emerging markets may be less liquid or riskier than those in more developed markets. In addition difficulties may arise in accounting, dealing, settlement and custody.
- Liquidity risk - Lack of marketability of a significant level of investment, i.e. securities cannot be traded quickly enough to prevent or minimise loss.
- Operational risk - The risk of loss resulting from inadequate or failed internal processes, people, systems or external events.

### The Risk and Reward Indicator

This indicator is based on historical data, using returns for an appropriate index for periods before the start of the class, and may not be a reliable indication of the future risk profile of the fund. The risk category shown is not guaranteed and may

## Charges

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	

Charges taken from the fund over a year	
Ongoing charges	0.75%
Charges taken from the fund under certain specific conditions	
Performance fee	0.00%

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment. The ongoing charge is based on expenses for the financial year ended 31/03/2016. This may vary from year to year. Ongoing charges exclude performance fees and portfolio transaction costs. The fund charges a management fee, which is reflected in the ongoing charges figure shown. For more information about charges, please see the relevant section in the prospectus.

## Past Performance

The chart shows the fund's annual performance for each calendar year. It is expressed as a percentage change of the fund's net asset value. Past performance is calculated in CHF. The performance figures include all ongoing charges and exclude any entry charges or exit charges. Past performance may not be a reflection of future performance.

\*The share class was launched on 25/11/2013, ceased operations on 07/08/2015 and re-launched on 30/12/2015. Performance during the period in which the share class was not in operation is based upon the performance of a similar share class.
